Recently graduated Computer Engineer consistently focused on continuous learning, improving technical skills, and expanding professional expertise. Experienced in collaborating within and leading technical teams. Highly capable of performing under pressure and delivering efficient problem resolution.

PROFESSIONAL EXPERIENCE

Sistelco S.R.L.

Project and Network Infrastructure Engineer

Tucumán, Argentina

April 2026 – Present

- Managed comprehensive IT infrastructure projects, coordinating the physical deployment of fiber optics, structured cabling, and IP equipment from on-site surveying to final delivery.
- Designed and implemented network architectures and developed technical-commercial proposals for corporate and government clients, ensuring scalable solutions tailored to specific requirements.
- Operationally directed on-site technical crews, efficiently managing deployment timelines and material resources to meet established delivery deadlines.
- Diagnosed and resolved critical technical connectivity incidents in real-time during project execution, minimizing the impact on deployment schedules.

IPSST - Instituto de Previsión y Seguridad Social de Tucumán

IT Help Desk Technician

Tucumán, Argentina

July 2025 – June 2026

- Administered first-level technical support within a highly critical institutional environment, resolving over 1,600 incidents and centralizing operational traceability using the GLPI ticketing system.
- Diagnosed, resolved, and escalated hardware, software, and network connectivity incidents, ensuring high availability and operational continuity for institutional services.
- Trained external and internal users on the use of institutional platforms, optimizing technology adoption and resolving technical issues.

EDUCATION

UNIVERSIDAD NACIONAL de TUCUMÁN

Computer Engineering

Tucumán, Argentina

March 2020 - September 2026

UNIVERSIDAD NACIONAL de TUCUMÁN

Extension Course - Full-Stack Web Development

Tucumán, Argentina

October 2022 - February 2023

TECHNICAL SKILLS AND COMPETENCIES

- Infrastructure & Networking: Network Architecture, Fiber Optics, Structured Cabling, IP Equipment, IT Technical Support, GLPI.
- Web Development: Node.js, Express.js, React.js, Vue.js, Next.js, TypeScript.
- Programming Languages: Java, C, C++, Python, JavaScript, HTML, CSS, SQL.
- Databases: PostgreSQL, MySQL, Firebase.
- Tools & AI Assistants: Git, GitHub, Vercel, Render, Supabase, Antigravity IDE, Claude, Gemini.
- Languages: Spanish (Native), English (B2 Level).
